Tools are **our** life too

Carey Tools is a medium size family firm. It has evolved over the past 50 years. We hire and sell tools for construction, engineering, maintenance and industrial applications. At this stage we operate throughout the 32 counties and have depots in Cork and Ennis. We understand the tool hire industry and are now the longest continuous firm in operation in this country.

Almost all the products we sell are tried and tested on our hire fleet so we can be assured that quality and reliability are of the highest standard. Many of the products we sell have been part of our range for most of our trading history. This has helped us develop excellent relationships with the manufacturers of the products we use.

This brochure lists the hire rates on the products we hire. We can provide full technical detail on request.

Thank you for supporting our firm and please contact myself or Alan or any member of our firm if we can be of further help.
