

CLIPPER NBM80 DRY 110V DRILL MOTOR

The NBM drill has been specifically designed for dry core drilling applications and features a powerful 1300W motor (0 to 2000RPM) enabling it to be used for dry cores up to 152mm diameter.

The NBM80 also features a built in mechanical clutch and a front end with a 1/2" BSP male adaptor so that standard dry cores with 1/2" BSP female may be fitted without the requirement of additional adaptors.

- Supplied in a robust steel carry case
- Can be run off a standard 3KVA continuous transformer

Maximum Core Capacity	152mm
